# PROJECTS

---

## ★ Khánh Hùng Academy - Mona Elearning

- **Technical Stack:** ReactJs, Nextjs (13), Typescript, Redux, Framer Motion, hooks, GraphQL, Restful API, Socket.io
- **Description:** Developed and managed the frontend of an e-learning platform specializing in creating and selling online courses. The platform offers features such as course creation, marketing automation, affiliate marketing integration and eLearning system setup, helping users monetize their knowledge effectively. Additionally, this project served as the foundation for replicating and bundling into dozens of other e-learning websites for the Mona Elearning system, expanding its ecosystem significantly.
- **Team size:** 5 members
- **Role:** The Lead Frontend Developer
- **Responsibilities:**
  - Led the frontend development of the platform, taking full responsibility for implementing most of the website's features.
  - Set up projects from scratch, researched technologies and libraries for the project
  - Collaborated with the backend team to integrate APIs for dynamic content, user management, tracking user by google analytics....
  - Integrated third-party APIs VietQR for payment processing and FPT AI Reader for account verification
  - Customized and adapted the core platform for multiple e-learning websites, ensuring scalability and consistency across the Mona Elearning system.
- **Project highlight:**
  - Successfully developed and launched the platform, attracting thousands of users to register and engage with the courses.
  - Over 400 users have upgraded to premium plans within the first 9 months, attracted more than 50 clients who implemented the bundle solution, showcasing the platform's effectiveness and user satisfaction

## ★ What it isNt - Ecommerce

- **Technical Stack:** ReactJs, Nextjs (13), Typescript, Redux, Javascript, Framer Motion, React Hook, GraphQL
- **Description:** Developed and maintained the official e-commerce platform for a street casual fashion brand. The website offers an intuitive online shopping experience with a focus on promoting sustainable and high-quality fashion.
- **Team size:** 6 members
- **Role:** Frontend Developer
- **Responsibilities:**
  - Collaborated closely with the backend team (Magento) to develop and enhance core website functionalities,
  - Additionally, implemented features such as wishlist management, streamlined cart operations, and a seamless payment flow to optimize the overall shopping experience and drive efficient product discovery.
  - Integrated third-party payment method with Momo & ZaloPay.
  - Took charge of maintaining, debugging, and optimizing the platform to ensure smooth performance.
- **Link Production:** <https://wiisnt.vn/>

## ★ Sophiedistributor - Ecommerce

- **Technical Stack:** ReactJs, Nextjs (14), Typescript, Zustand, Tailwind CSS, GraphQL, i18n
- **Description:** Developed and managed the frontend of Sophie Distributor. The website focuses on providing an intuitive interface for customers and distributors, offering features for product discovery, order management, and seamless transactions.
- **Team size:** 5 members
- **Role:** Frontend Developer
- **Responsibilities:**
  - Handled data processing on both client-side and server-side to enhance SEO performance.
  - Set up multilingual features to cater to a diverse audience.
  - Maintained, debugged, and optimized the platform for seamless performance and user experience.
